STAGE ONE INSTRUCTIONS

1. Remove the vacuum slide from the carbs. Remove the spring from slide. Thread one of the slide cover screws into the center of the needle retainer (Fig. A) and pull up gently. Remove stock needles & spacers, noting the order of assembly (Fig. B)

2. Install the Dynojet needles on groove #2, using all stock spacers (Fig. B). Install the Dynojet washers above the E-clip. Install stock spring retainers with the Dynojet springs.

3. Remove the stock main jets and replace with the Dynojet main jets provided. If you are running the stock exhaust use the DJ120 main jets, if you are running an aftermarket header or slip-on with high flowing baffle, use the DJ124 main jets. Be sure that the jets you are changing are the main jet.

4. Locate the fuel mixture tab (Fig. C). Using the tool supplied, carefully turn mixture tabs clockwise until seated, then turn back out 2 turns or where you find your best idle.
